Revolution Web Call Accounting

*is the most dynamic
browser-based telephone
reporting solution for
Avaya one-X
Quick Edition*

Visit our Avaya Compliant Products website for more information about our latest offerings tailored specifically for Avaya customers.

www.telecost.com/avaya

The built-in web server provides full browser implementation without the need for complex industry web servers like IIS and Apache. The internal web server can run on any available port. The software collection module can run as a service and eliminates the need for a buffer box.

Works with all call detail formats

Data collection can be received from many sources including tcp, serial and file. Our library of drivers includes all call detail formats for Avaya one-X Quick Edition logs. In fact, if we do not have a driver for your data format we can easily create one using our scripting language.

Comprehensive reporting tools

Whether you want detail, summary, and graph reports, Revolution Web Call Accounting can provide them without any special training. Revolution Web Call Accounting can monitor incoming and outgoing calls in real time. Alarms and reports can be scheduled for emergency 911 notification, toll fraud or misuse reporting. A built-in contacts database can be used to quickly identify all calls made to / from a particular contact and tagged as personal or business related.

Intuitive and comprehensive reporting solution

Revolution Web Call Accounting installs quickly and easily. The integrated installation wizard asks a few basic questions then proceeds to configure the application in seconds. For the novice user, Revolution Web Call Accounting comes with informative online help that can be accessed at the click of a button, providing easy-to-understand examples about the current task.

Can be deployed in any industry segment

Revolution Web Call Accounting is an industrial strength, fast and reliable call accounting software package. Revolution Web Call Accounting can be deployed in virtually any enterprise including hospitality, retail, government agencies, brokers, professional firms, banks, hospitals and universities. Telecom managers find it increasingly difficult to allocate telecom costs to various departments or cost centers or individuals. This solution will pinpoint charges, highlight misuse and increase productivity.
