

SHADOW

Internet Reporter

Examine and Report on Internet Activity of All Your Users

SHADOW Internet Reporter is a powerful surf activity monitoring solution that allows administrators to monitor the browsing activity of employees or students.

SHADOW^{IR} is a comprehensive time management, security and productivity enhancement reporting solution. Managers can generate reports to examine and monitor internet behavior. The data can be used to educate personnel, establish usage policies, detect intrusion activity and monitor network bandwidth.

Discover the benefits of SHADOW^{IR} Internet Reporter

Tracking and Reporting on Internet Activity

- Monitor web browsing activity on a per user or per computer basis.
- Comprehensive reporting in both tabular and graphical formats.

User friendly console

Intuitive graphical console for monitoring and reporting on browsing activity.

Email Reports

Automatically have specific reports generated and emailed to the manager/administrator on a scheduled basis.

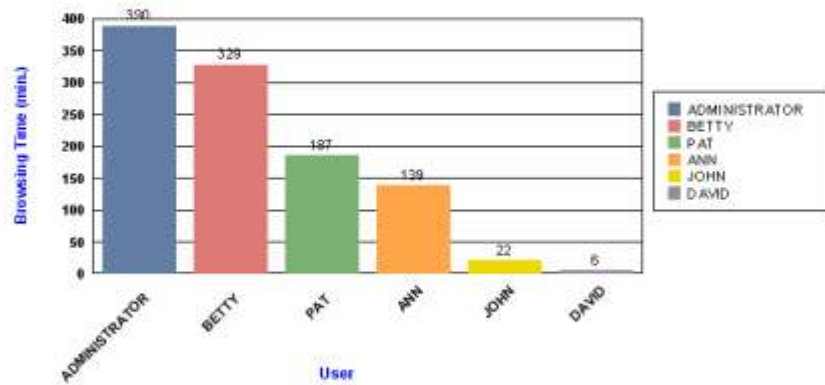

Schedule URL Tracking

Collect Internet browsing activity based on administrative requirements. For example administrators may be interested in tracking data only during business or school hours.

Top 10 Users by Browsing Time

Date Range: 06/02/2009 To 06/02/2009

Bandwidth Monitoring

Track the Internet traffic on your network to isolate users that are congesting the organization's bandwidth.

Remote Screen Capturing

Monitor user computer usage practices by capturing screenshots of their activity.

Export URLs to SHADOW Internet Control

Offensive or unauthorized sites can be exported to SHADOW Internet Control and automatically added to the Blocked List for real time security and productivity management.

Internet reporting is a part of a total unified communication management arsenal. Productivity loss from misuse of a combination of popular communication facilities such as non-business telephone and mobile calls, personal email, hiding behind voice mail and internet browsing can cost companies 30 minutes to two hours per day per employee. If each business owner extrapolates these findings based on lost salaries and opportunity cost the numbers are staggering. Contact us to find out more.
